# Cryocell Pro

## What is Cryocell Pro?

Cryocell Pro is based Cryoelectrophoresis technology. This technology allows for a significantly stronger current.

Studies have shown that the Cryoelectrophoresis technique can use a current that is 200% ~300% stronger than the traditional ionophoresis current.

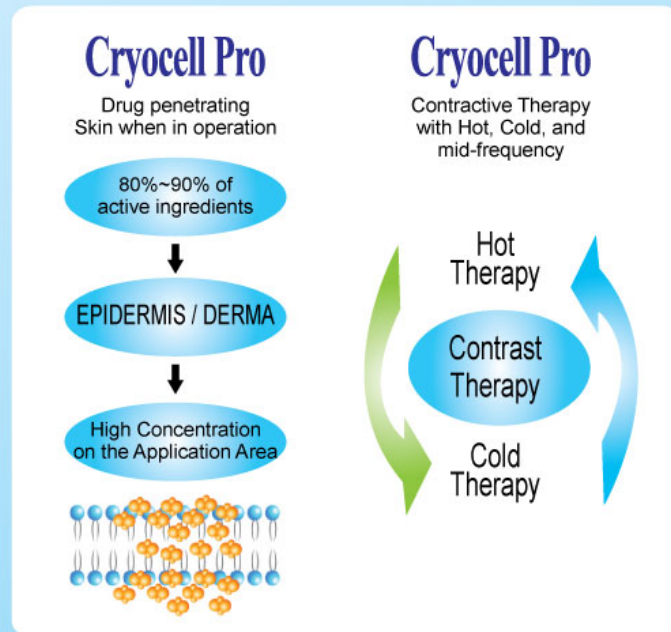

The significant difference in strength of the current allows Cryoelectrophoresis to deliver 80%~90% of the active ingredient, while ionophoresis only delivers 5%~10%.

This also combines with many effective therapeutic Functions

- 1) Cyro Therapy
- 2) Hot Therapy
- 3) Lontophersis
- 4) Electric Mid Frequency Therapy

## How it works?

Refrigeration of the skin: The temperature of the frozen hand piece, which is between -10 C, protects the skin from possible burning. Traditional ionophoresis uses a considerably weaker current in order to protect the skin from burning, which in turn, limits the depth of penetration. As a result, most of the active ingredient remains on the surface of the skin, where it has little therapeutic value and defeats the purpose of ionophoresis.
